WORK Experience

● Front End Developer / 2017 - Present

Zift Solutions - JavaScript/HTML5/CSS3, PHP7, Gulp.js, Sass/LESS, Jira, Git, Adobe Suite, development of marketing sites, MJML EDMs and other deliverables for the likes of Atlassian, Oracle and Juniper. Promoted to Lead Front End Developer, and was a key strategist earning \$1.2 million in revenue in industry leading campaigns. This surge led the company to it's acquisition. Henceforth, I led the migration of competing products between the two companies, merging all the best features together into one solution

● UI Developer/Designer / 2014 - Present

ThinkZion, Timber Sierra - Custom Website builds including a soon to be released Custom CMS built from the ground up using JavaScript/HTML5/CSS3, PHP7, Gulp.js, Sass, Git. Serial entrepreneur and owning 50% of two startup companies, formulating marketing direction for the newly established business. Primary client and sales manager who helped clients to gain momentum. A key member of the production output too such as designing laser cutouts in Illustrator and building a complex shopping cart platform UI

● Web Designer/Front End Developer / 2017

UTS: BuzzBox, Marketing Eye - JavaScript/HTML5/CSS3, jQuery, Bootstrap, PHP7, MVC, SourceTree, Git, development for BuzzBox, a custom corporate gift company that is the first of its kind as a Front End Developer. Development of Style Guides, Web Banners and PhotoShop, Illustrator and InDesign production for print assets such as logos
